

WhizzClick

Tired of "control" that stops when your dog is let off the lead?

Then the "WhizzClick." is for you!

A creative design bringing a new concept to clicker training - the whistle and clicker combination can only enhance the future of kind, effective and positive reward training. Researched and designed by Stephen G King, the UK's specialist in dog behaviour.

Its ergonomic shape is comfortable to hold in your hand and the raised button on the clicker makes it easy to find and press. The combination whistle and clicker with the "Easyclick." technology (NEVER MISS A CLICK) gives you the best of both worlds!

Lets you click every time with less effort -- and with gloves on. No need to fumble for that little opening and then finding that it is the wrong end!

In addition, the clicking element inside the WhizzClick. is made of stainless steel and will not rust.

The whistle can be used as a cue or command and the clicker to mark the behaviour.

Using a whistle instead of your voice gives us a tool that makes a unique sound that really works when out of sight, at distance, heavy cover or if the dog is close in windy conditions, which can make it difficult or impossible for the dog to hear verbal commands.

This is the ultimate combination clicker and whistle together with a revolutionary design.
